Provide Instructions and Resources for Assessment and Training in Earthbuilding

EARTH the most creative, universal building material for sustainable architecture, building and decoration.

ECVET a tool to create resources for training to support two growing business sectors: eco-construction and retrofitting for environmental and energy requirements.

PIRATE a project to develop a complete ECVET for earth building !

Our units of learning outcomes, vehicles of new standards of competence needed by a growing market, will:

- empower professionals, offer modular qualification, encourage employment opportunities and mobility, further skills training to help job search;
- guide teachers when defining new content and assessment procedures, judging learners performance;
- be a tool for certifying bodies when reviewing or creating qualifications, looking for transnational compatibility.

Most PIRATE partners have contributed to other European funded projects with an earth building emphasis. The PIRATE workgroups will create links, share experience and accumulate results.
